Brief Statement about Dr Rajiv Pandey

Having 28+ years of experience, I am a Fellow of the two National Academies NAAS and NESI and also a Fellow of National Institute of Ecology (NIE), currently working **in the Indian Council of Forestry Research & Education**, as **Scientist F and Head in Division of Forest Ecology and Climate Change, ICFRE-Institute of Forest Productivity, Ranchi since Jan 2026 and additional Charge as Head, Forestry Statistics, Indian Council of Forestry Research & Education, Dehradun since Oct 2019**. During the period, I have also worked as an **Associate Professor in HNB Garhwal University, Srinagar, for three years**, and also served as **Additional Director for a year in the Ministry of Environment, Forest & Climate Change, New Delhi**, as a special appointment.

My research has been published in 208 articles in peer-reviewed national and international journals with 7289 citations, with an h-index of 44 and an i-index of 113. I am in the list of *World's Top 2% Scientists published by scholars of Stanford University* since 2021 and was also *Coordinating Lead Author (CLA) for Chapter VIII of the Working Group II Contribution to the Intergovernmental Panel on Climate Change (IPCC), a UN Body, for the Sixth Assessment Report*.

I am a *Member* of American Meteorological Association and member of Editorial Board for *Ecological Indicators* and *Regional Sustainability* (both Elsevier); *Journal of Modern Agriculture* (Wiley) and *Innovation* (Chinese Academy of Sciences); and *Associate Editor* for the *Environmental and Sustainability Indicators Journal* (An Elsevier) and *Subject Editor* for *International Journal of Environmental and Ecological Sciences* (A NIE Society) and also a regular *Reviewer of Multi-Country Projects on Global Change for the Asia Pacific Network (APN), Japan*.

I am reviewing papers for more than 60 journals focusing on natural resources, forest ecology, vulnerability, and adaptation of social systems to climate change, being published from Elsevier, Springer, Taylor & Francis, Wiley, and Sage.

Over these years, I have gained insights into the natural resource contribution to the welfare of dependent communities; carbon sequestration by forests and trees; valuation of ecosystem services; climate change ecological and social vulnerability and adaptation assessment; plant functional trait-based assessment of ecosystem services. I am also dedicated to my time in learning and updating my understanding of the non-linearity of natural resources supply and demand for the contribution to society and resolving the impacts of climate change.

Experience: 28 Years + (Since 6th April, 1998)

Domain of Research/Consultancy

- ❖ Eco-rehabilitation of mined areas
- ❖ EIA and SIA of development projects
- ❖ Climate Change
 - ❖ Social Vulnerability Assessments
 - ❖ Adaptation Assessment
 - ❖ Carbon assessment and REDD+
- ❖ Ecosystem Goods and Services
 - ❖ Functioning of the ecosystem
 - ❖ Contribution of Tangible Benefit Assessments
 - ❖ Contribution of Intangible Benefit Assessments
 - ❖ Evaluation as a Coping Instrument
- ❖ Data Science
 - ❖ Designing experiments for data collection
 - ❖ Data analysis
